

# StrikePlagiarism.com

and Moodle

Admin`s manual

Moodle integration is rooted based on a plugin that is available in the plugin registry. StrikePlagiarism supports all the latest versions of the Moodle.

**Follow the link:**

[https://moodle.org/plugins/plagiarism\\_strike](https://moodle.org/plugins/plagiarism_strike)

In order for the integration to be successful, you need to select the required version of the plugin and contact us to obtain an API key.

Do not forget to set up a cron process on your server for your Moodle. The Strikeplagiarism plugin will not work properly without it.

The plugin requires a php Moodle script to be added to the crontab of the server where Moodle is installed.

1. Login to the server using SSH.
2. Edit the crontab using the **crontab -e** command.

```
root@DESKTOP-HLOB8GL:~# crontab -e|
```

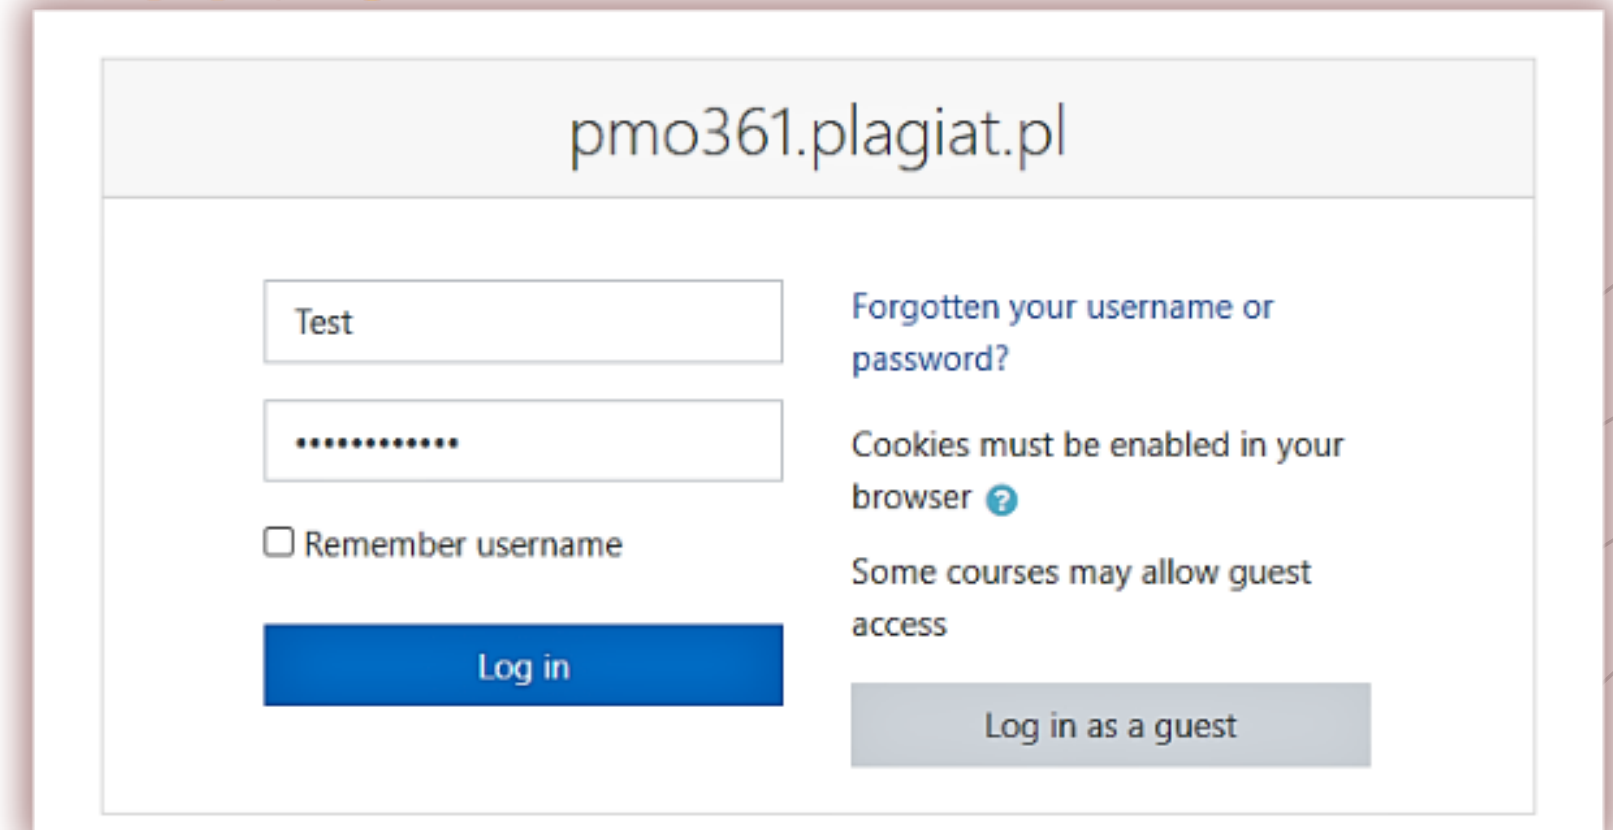

3. Add new line (Make sure to replace path to your moodle home directory).

```
* * * * * php /var/www/moodle/admin/cli/cron.php
```

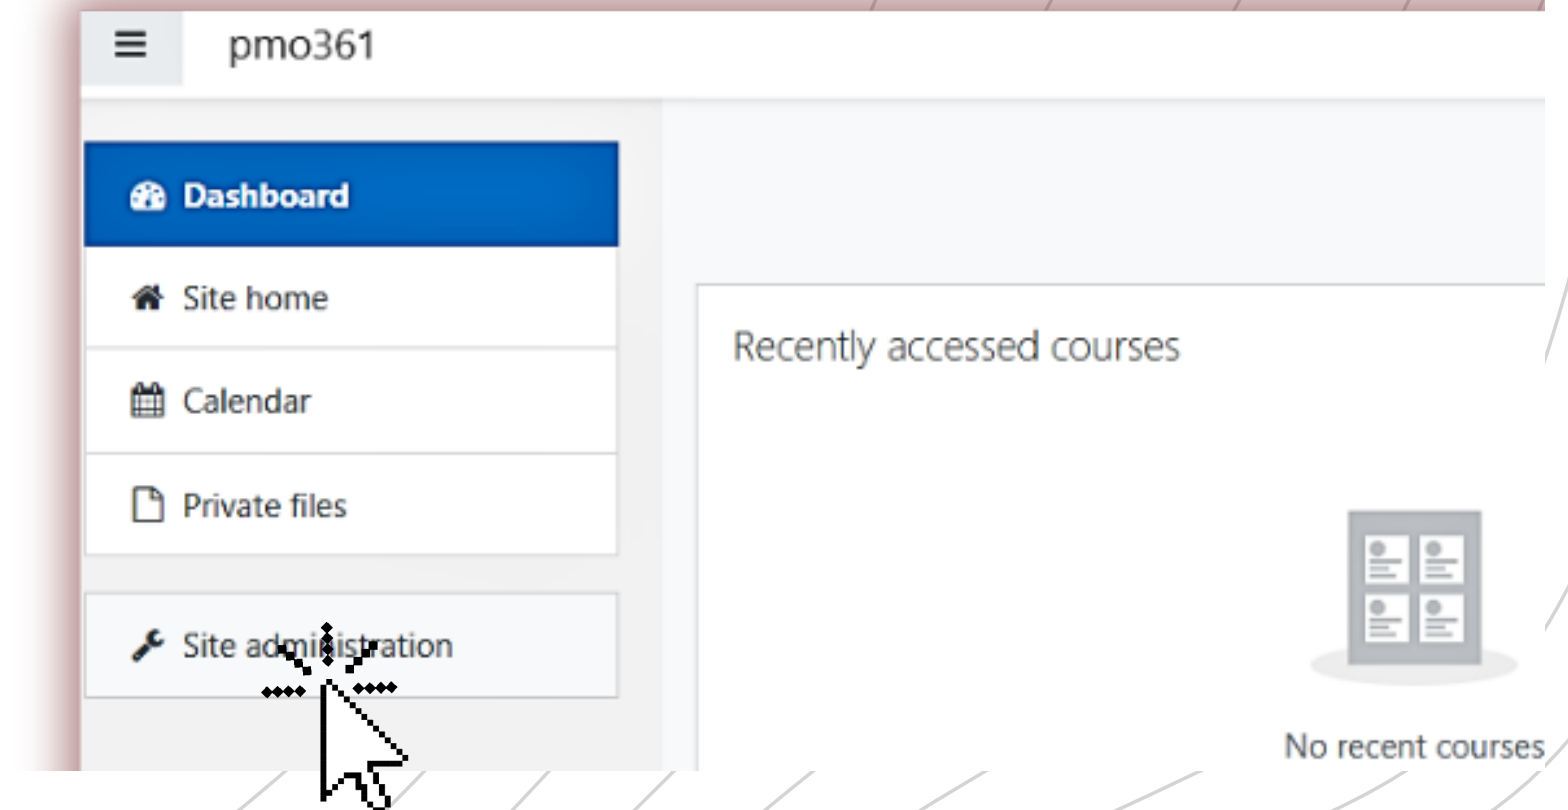

```
# For more information see the manual pages of crontab(5) and cron(8)
#
# m h dom mon dow   command
* * * * * php /var/www/moodle/admin/cli/cron.php
```

4. Save the file

1. Login into your University account

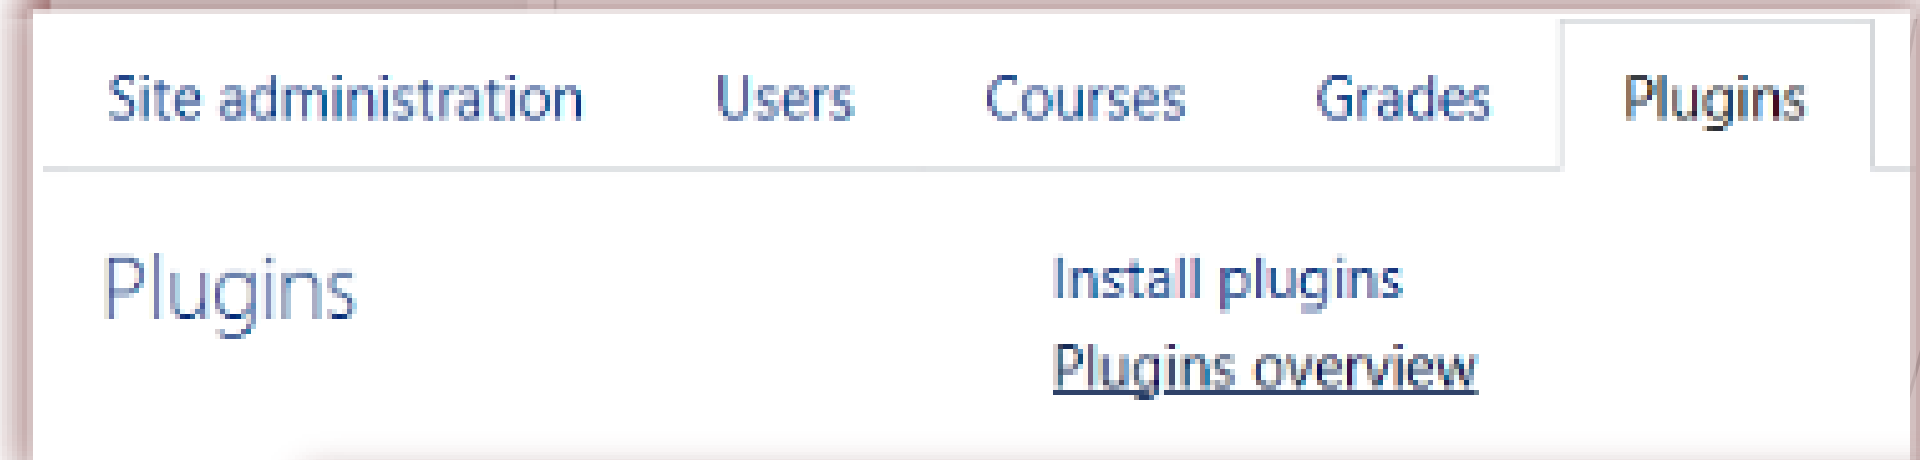

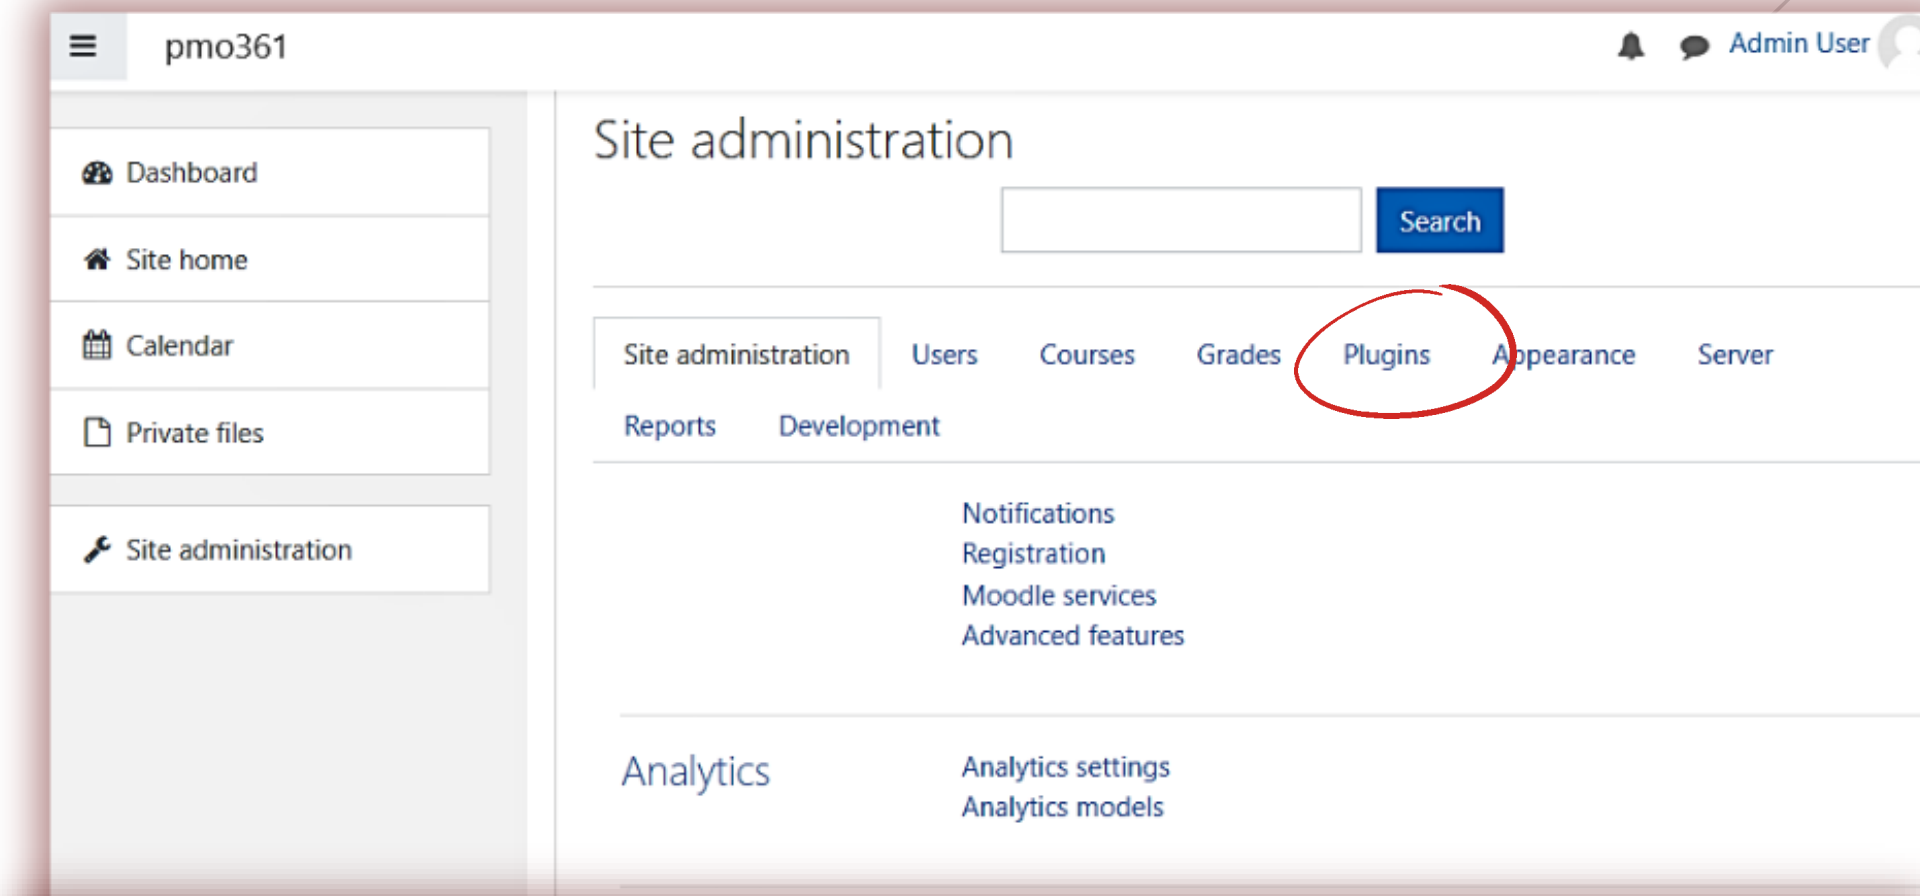

2. Then you will see the main page and in the menu you need to find “Site Administration”, click on it

3. Find “Plugins”  
and click on it

4. At “Plugins “ click “Plugins  
overview” to check if you have  
plugin stikeplagiarism.

Search for: StrikePlagiarism.com

Plagiarism plugins ⚙️		
StrikePlagiarism.com plagiarism_strike	3.7.0 (build 2022021200) 2022032200	Settings Uninstall

5. Click on “Settings” and check if you have :

- At “Strike API Host this link:  
<https://lmsapi.plagiati.pl>
- And at Strike API Key password (you should get it from us)

The screenshot shows the Moodle Strike Settings page. At the top, there are three tabs: "Strike Settings" (selected), "Strike Defaults", and "Strike Debug". Below the tabs, there is a link for more information: "For more information on this antiplagiarism system and how it works see: [www.StrikePlagiarism.com](http://www.StrikePlagiarism.com)". A checkbox labeled "Use strike plagiarism plugin" is checked. Below this, there are two input fields: "Strike API Host" with the value "https://stapi.plagiati.pl" and "Strike API Key" with the value "Your API KEY". A "Test API connection" button is located below the input fields. At the bottom, the "API connection status" is displayed as "200: Connection ok".

6. Click on “Test API connection” . And if your “API connection status” is green and text : “200: Connection ok” then the settings are set correctly.

API connection  
status

**200: Connection ok**

Log in as a system administrator in Moodle.

The screenshot shows the Moodle login interface for the URL pmo361.plagiat.pl. It features a username field containing 'Test', a password field with masked characters, and a 'Remember username' checkbox. A blue 'Log in' button is positioned below the password field. To the right, there are links for 'Forgotten your username or password?', a note about cookies, and a 'Log in as a guest' button.

Go to Administration and then choose Advanced Features.

The screenshot displays the Moodle administration menu for the site pmo361. The 'Site administration' menu item in the left sidebar is circled in red. The main content area shows a navigation menu with 'Site administration' selected, listing sub-items: Users, Courses, Grades, Reports, and Development. Under 'Advanced features', a mouse cursor is hovering over the link.

PLUGIN INSTALLATION GUIDE

In this list of advanced features, find enable plagiarism detection.

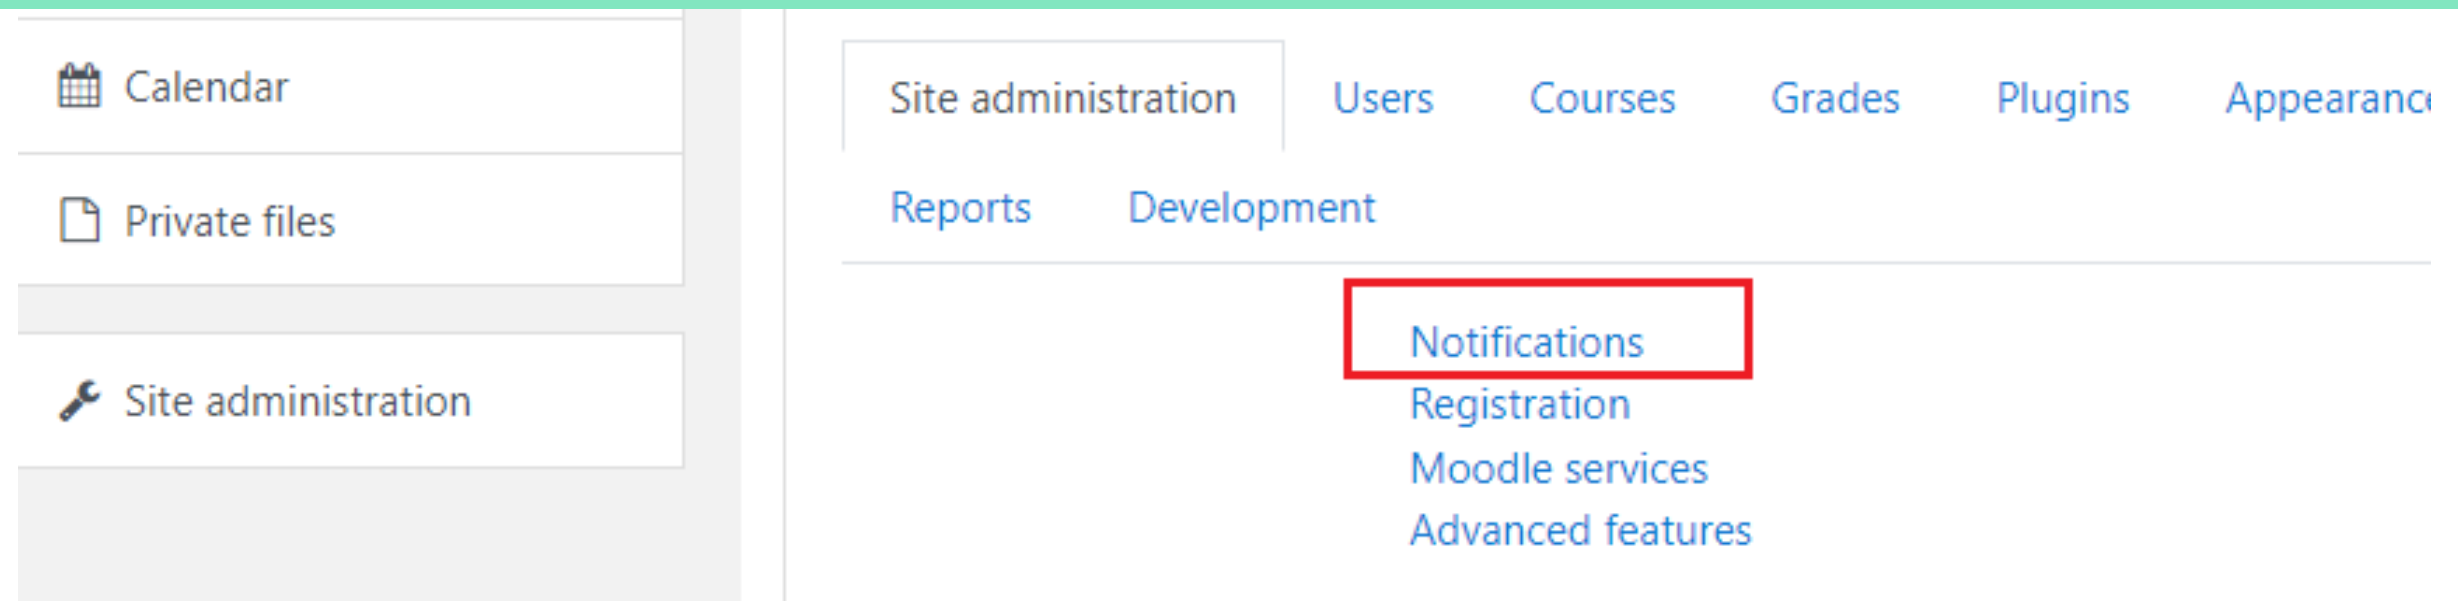

Enable plagiarism plugins  
enableplagiarism

Default: No

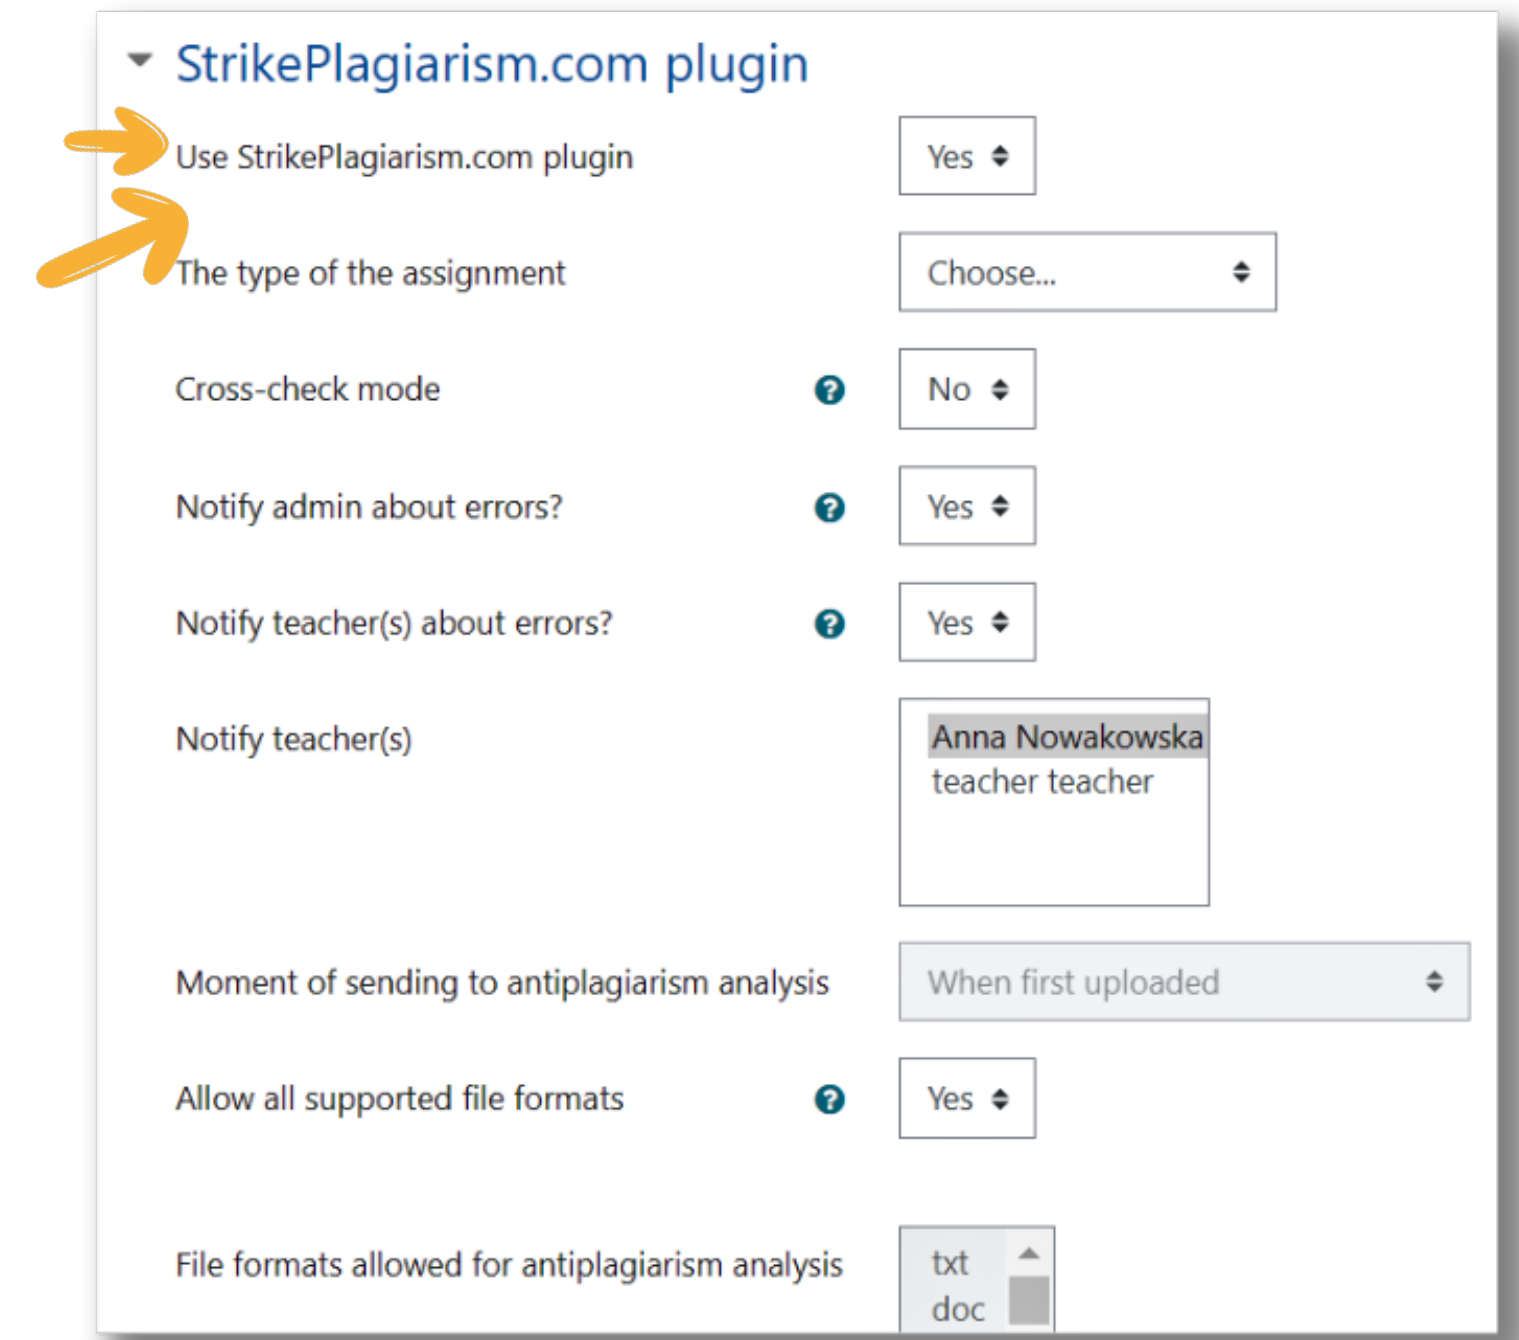

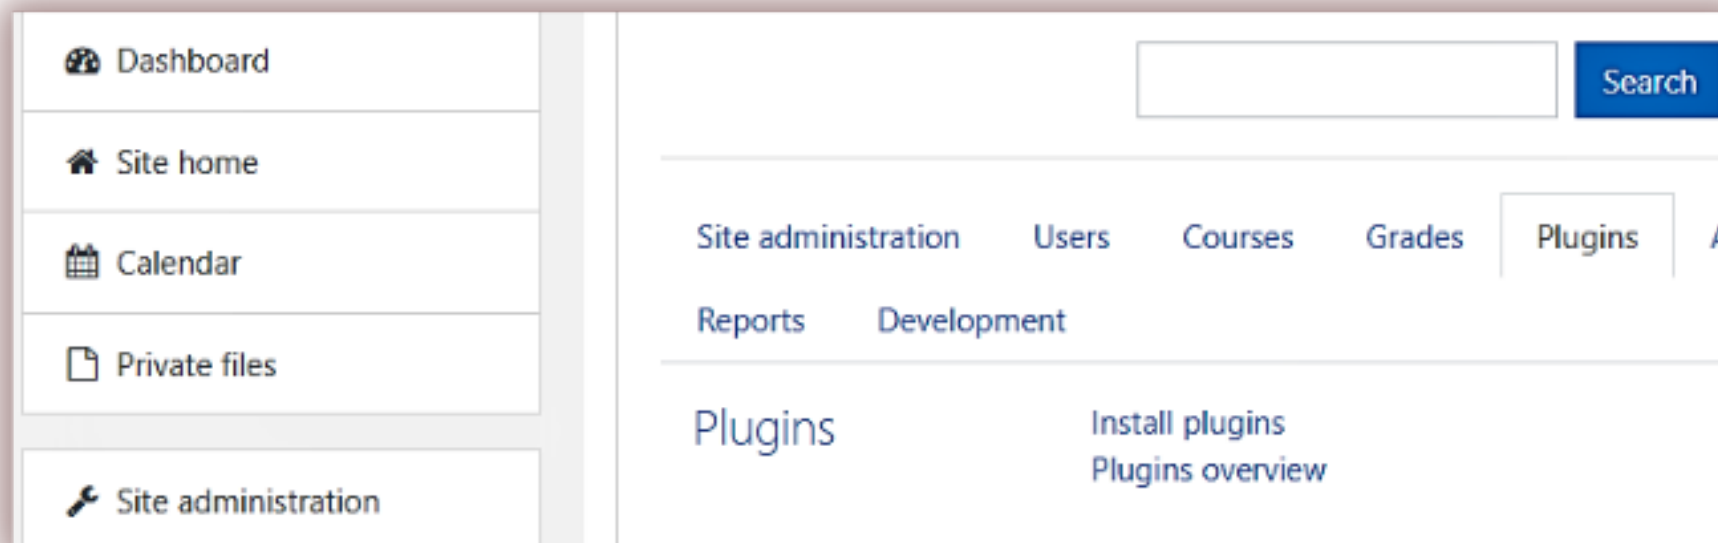

This will allow administrators to configure plagiarism plugins (if installed)

Copy the plugin from moodle \ plagiarism \ strike to <your moodle> / plagiarism  
The system will automatically prompt you to install a new plugin or go to Administration - Notifications.

Access the Moodle configuration page “Strike Plagiarism Checker” using Administration-> Plugins-> Prevention of Plagiarism

Select “Yes / No” “at Strike plagiarism plugin” to enable or disable anti-plagiarism verification.
